

FX Direction - Strategy & Backtest Report

End date (cap): 2026-05-01

Last N observations: 500

WF window (bars): 200

Train / test split: 70% / 30%

PCA components: 10

Probability threshold: 51%

Target modes: binary

Leads (days): 1

Pairs: EUR/USD

Cross-pair features: yes (all others merged)

GARCH features: yes

Walk-forward: rolling window with inner train/test split; OOS predictions pooled. Backtest: binary = long/short from two classes; ternary = long / flat / short from three classes. Threshold mode: trade only when max class probability meets the threshold (else flat). Rankings: Sharpe ratio on stitched OOS strategy returns.

Run summary

Successful runs: 1 / 1

EUR/USD (EUR_USD) - binary, lead 1d

Rows used: 500 | Effective end: 2021-12-29

WF folds: 6 | Train / test per window: 140 / 60

Best strategies (top 5 by OOS Sharpe, threshold backtest)

> SVM (RBF) | XGBoost | Ensemble (weighted train acc) | Ensemble (mean proba) | Random forest
